

Acoustic Curve

A curved freestanding mobile acoustic partition screen with lockable castors and ridged surface design which can be pushed together in a variety of different orientations to suit the space.

- Curved shape for organic layouts
- Double sided acoustic surface
- Mobile and easy to move
- Excellent acoustic performance
- Contemporary frameless design

Designed to work with the ThinkingWall Acoustic products the Acoustic Curve offers a lightweight partition screen with sound deadening benefits. The curved acoustic partition can be used individually or in groups to separate or divide office spaces.

When paired with the ThinkingWall Acoustic Freestander temporary work spaces or zones can be created. Mixing the straight and curved sections means these units can be configured in a variety of different layouts to suit the office or room they are in.

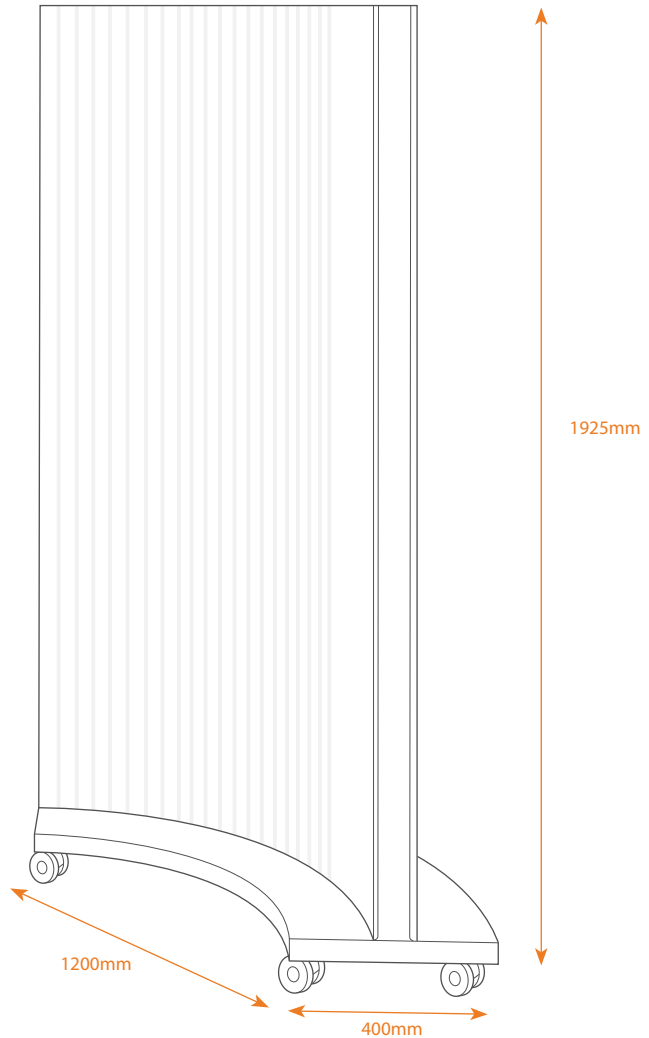

SPECIFICATION

Overall width: 1200mm
Overall height: 1925mm
Base width: 400mm

The curves can fit at each end of a single wall, next to each other to give a more enclosed booth, or in an S shape to offer pod-type spaces on each side. They can be quickly and easily re-configured to layout as required.

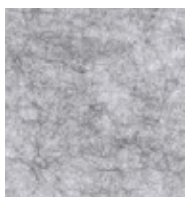

The acoustic panels provide sound deadening and reduction properties ideal for busy offices and open plan spaces.

The acoustic panel is made from 100% polyester and contains a minimum of 65% post-consumer recycled material; it is completely safe, non-toxic, non-allergenic and non-irritant.
