

Whole Wall Whiteboard

A frameless modular magnetic whiteboard system, ThinkingWall delivers the functionality of a traditional whiteboard with a high quality, contemporary look and feel. It is designed to create a workspace uninterrupted by borders or frames allowing teams or individuals to collaborate, think and work visually.

- Virtually any size
- Magnetic dry wipe surface
- Continuous writing surface
- Made to measure
- Professionally fitted

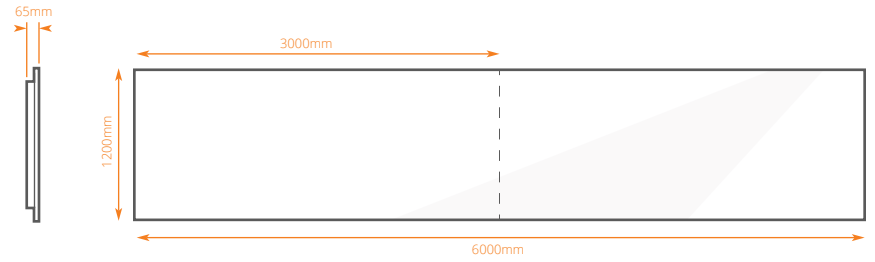

All ThinkingWall whiteboards are made to measure and we produce exact sizes to fit your space. Multiple panels are joined to form continuous surfaces with tightly butting, tensioned seams and the purpose made mounting frames are bespoke, with finishing details matched to enhance your workspace.

The high quality drywipe and magnetic receptive surface can be used to write notes, draw, present work and pin accessories magnetically to the face. The edges are finished with a slight chamfer which enhances the minimalist modern finish.

SPECIFICATION

Size: made to measure

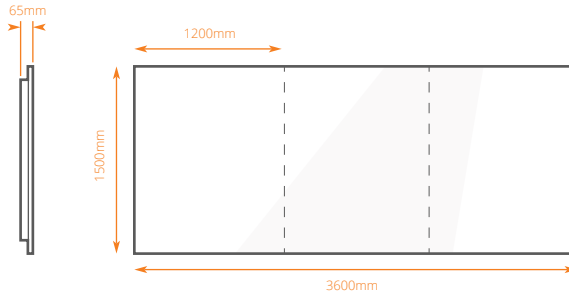

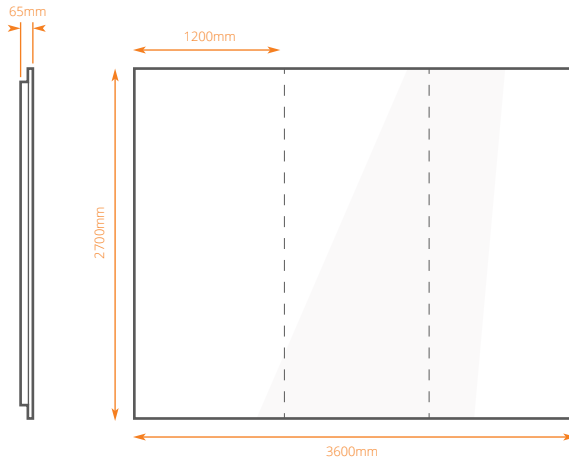

See examples of typical layouts

ThinkingWall is backed by a full service from specification to installation, as well as an extensive range of standard and custom accessories.

A sub frame is used to spread load, provide a secure wall fastening and to facilitate the tensioning of joining seams.

Subframes are 45mm in depth and generally 100mm in from the panel edges, finished in white.

CUSTOMISATION

All ThinkingWall whiteboards are manufactured in custom sizes to suit the space they are designed for. We can advise on efficient sizes or make to exact sizes.
